SAMAY[®]
SPECIALISED VEHICLES

SAMAY[®] DIESEL BOWSER

SAMAY[®] SERVICE VAN

SAMAY[®] EXPLOSIVE VAN

SAMAY[®] WATER TANKER

SAMAY[®] MOBILE DIESEL BOWSERS

The SAMAY[®] mobile diesel bowser is a tank mounted on the chassis of a vehicle with a dispensing unit which dispenses the fuel and also maintains records. SAMAY[®] diesel bowser are designed and fabricated to store, transport and supply diesel to working areas where diesel dispensing stations are not available. For infrastructure, construction, cement, port, airlines and mining industries, SAMAY[®] diesel bowzers bring these benefits :

- Ensures operation safety
- Ensures efficiency in fueling
- Prevents contaminants from entering equipment engine
- Ensures accountability in fueling operation
- Prevents pilferage and theft (unaccounted loss) diesel

The mobile diesel bowser is fabricated as per the Indian Petroleum Act of 1934 and the revised guidelines of 2002/2011 with all the safety features prescribed by the Petroleum and Explosive Safety Organization, Nagpur, of the Ministry of India.

When you buy a SAMAY[®] diesel bowser, we will help facilitate for you with the Explosive Approval from the Chief Controller of Explosive (CCOE) Nagpur, and subsequently Explosive License from the Regional office of the joint CCOE for the required Customized Service Van as per specific applications.

NECESSITY OF MOBILE DIESEL BOWSERS

In the present competitive scenario, it is simply not economical to keep equipment idle without refuelling for any length of time. Our mobile diesel bowser & dispensers can reach your equipments, wherever it may be located - whether on uneven roads, deep pits, in difficult terrain, far away from petrol pumps. Our mobile diesel bowsters can refuel equipments like excavators, cranes, loaders, backhoe loader, pilling rigs, dumpers, DG sets and more, which operate in rural, mining and remote areas.

THE MAJOR COMPONENTS OF SAMAY[®] MOBILE BOWSERS

- M.S. Petroleum Tank
- Man holes, with pressure vacuum valves, emergency vents, fill pipes, dip pipes and dome cover
- Emergency shut-off valves
- Electric pump 12V / 24V or PTO driven pump
- Fuel meter (Mechanical/Digital)
- Self - Retracting imported Hose Reel with auto cut-off dispense nozzle
- Stand-by hand pump for alternative dispensing of diesel in case of failure of mechanical pump
- Fuel filtration kit providing upto NAS6 cleanliness
- Nano coated tank's to ensure longevity of bowsters in extreme condition.

SAFETY FEATURES AS PER CODE (Chief Controller of Explosive)

- Fire screen behind driver's cabin
- IS specified 10 kg. DCP fire extinguisher
- IS specified 1 kg. DCP fire extinguisher in driver's cabin
- Double pole switch or battery isolation switch in driver's cabin
- Static discharge bonding reel with cable and crocodile clip
- Earthing plate
- Re-route exhaust to cabin front and installation of spark arrestor (CCOE approved)
- Emergency Shut Off Valves

SAMAY[®] SERVICE VAN

SAMAY[®] Mobile Service Van is a customised mobile workshop to service, repair and maintain equipment on site without the need for the equipment to go to the stationary workshop for minor repairs. This eliminates costly downtime, thereby preventing loss of production. SAMAY[®] Service Vans are fabricated as per the demands of the job on site and are fully capable to resolve most on-site emergencies.

THE MAJOR COMPONENTS OF SAMAY[®] SERVICE VAN

- Oil and Grease Kits
 - Air Compressor
 - Diesel Generator
 - Welding Machine
 - Water Tank with Washing Pump
 - EOT
 - Crimping Machine
 - Tool Boxes
 - Working with Bench Vice
- And many more, as per requirement

SAMAY[®] EXPLOSIVE VAN

SAMAY[®] Explosive Vans are specialised customised vans fabricated as per the standards and guidelines set by the CCOE to carry explosives and magazine for various blasting requirements. The explosive vans are customised as per the magazine capacity requirements of the cement and mining companies.

SAMAY[®] WATER TANKER

SAMAY[®] Water Tankers are specially fabricated vehicles with sprinkler, mist, water guns and water monitor systems for mining and cement manufacturing applications. These tankers are customised as per the capacity requirements of the customers.
